*Prior Art Citation*

**1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.**

Kadowaki et al. (2002/0039338), Takamine et al. (5,805,543), Park (2002/0060964) and Nagaoka et al. (2002/0080692), all disclose an optical disk apparatus having the ability of detecting and correcting tilt between the objective lens and optical disk.

*Reasons For Allowance*

**The following is an Examiner's Statement of Reasons for Allowance:**

Re claims 1-18

The prior art of record alone or in combination does not teach or suggest the method and apparatus for correcting an inclination of an objective lens relative to an information recording medium having the combination of steps and elements with their recited, process, structure and functions, along with: producing a direct current signal for correcting the inclination of the object lens; superposing an alternating current signal having a prescribed signal characteristic onto the direct current signal to produce a driving signal; and correcting the inclination of the object lens using a driving mechanism operated by the driving signal, as set forth in claims 1-18.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
